WUYI LONCIN BOTTLE CO.,LIMITED

# Our Factory

## About us 关于我们

Wuyi Loncin Bottle Co., Limited founded in 2007, located in the hometown of drink-ware YongKang City of Zhejiang Province, China. Our company is a professional metal and plastic drink-ware, bar-ware manufacturer with 120 employees.

Loncin specialized in Designing and manufacturing all kinds of high-quality products, including stainless steel sports bottles, vacuum flasks, coffee mugs, travel mugs, tea and travel pots, auto mugs, plastic thermal mugs, acrylic tumblers, glass sport bottles and many more drink ware. Many customers come to us for OEM business.

All loncin products comply with FDA, BPA FREE, LFGB, SGS and CE standards. So you can rely on our quality. We can produce more than 8 million units of products per year.

Our products are mainly sold to clients in more than twenty countries and regions, such as the USA, Canada, Australia, the UK, Germany, France, the Middle East, Japan, South Korea, Hong Kong and so on.

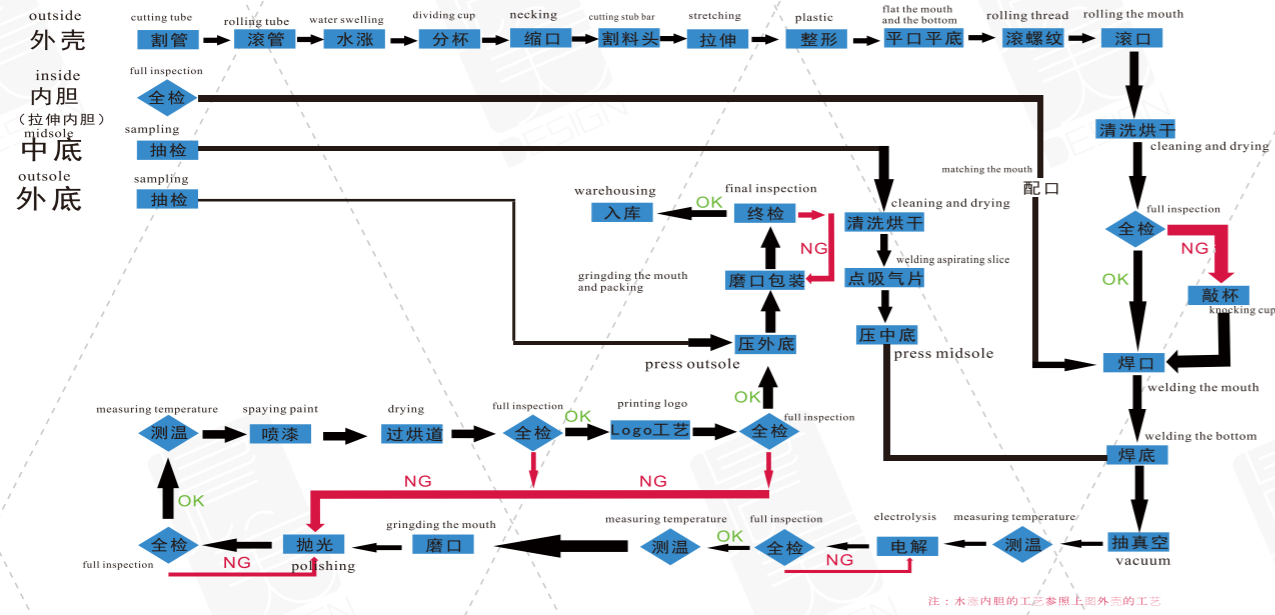

Honesty, promise and innovation is our company's policy. Better, larger, Stronger, Win-Win is our company's pursuit.

## Stainless Steel Insulated Bottle

**DOUBLE WALL VACUUM INSULATION** - Specifically designed to keep your beverage the right temperature for a very long time. Whether it's for hot coffee on those freezing mornings to those sweltering hot days at the beach with ice water, you can expect this to keep liquid piping hot for hours or keep beverages with ice for most of the day. When sealed, hot liquids several hours or more hours and liquids with ice for an longer time

the loncin bottle - This giant was made for those occasions where you need that huge amount of liquid for those events or trips whether it's hot coffee for a group or iced water for that long hiking/ climbing trip adventure somewhere, you can count on this to not only keep your liquid cold or hot, but to have enough liquid for the entire day.

Enjoy cleaner, more delicious beer or wine flavors by keeping them ice cold.

There's nothing worse than heading out to enjoy a day outside with friends and family, popping open a cold, refreshing beer, and having it get warm faster than you drink it because the weather is so hot. The screw-on cover can hold in cold temperatures to keep your beers or wine from watering down, getting warm, or tasting skunky.

Designed specifically for men and women who love getting outside and having a bit of fun, these durable and reusable beer or wine insulators hold your beer or wine tight without impacting drinkability. Better yet, you can keep sliding in a fresh beer from the cooler and it will retain the cold freshness even while you're playing corn hole, disc golf, throwing horseshoes, enjoying a dip in the ocean, fishing out on the lake, and so much more.

This mug can be replaced with this handle

*Spreading warm, Sowing the love,  
honing every piece of bottle with the  
truth and the preciseness.*

# Wide Mouth Sport Bottle

*Leisure Is An Empty Cup,  
It Depends Entirely On What We Pour Into It.*

# Food Jar

*Perfectly Portable:* Our thermos food jar is large enough to fit an entire meal yet small enough to fit in kids lunch boxes and adult lunch bags. Confidently pack your sweat-proof and leak-proof food jar in your bag or backpack without worrying about spills or leaks. Take your food thermos to school, work or travel without needing to reheat or refrigerate your food.

*Functional Style:* This versatile lunch thermos is great for toddlers, kids and adults. Use your thermos food containers for hot foods such as pasta, soup or chili. The wide mouth of this modern lunch jar makes filling and cleaning the jar a simple task.

*Health in Mind:* With our insulated food flask, you can skip on eating outside food and pack a healthy, homemade meal instead. Pack hearty oatmeal for breakfast, hot soup for lunch or fresh fruit for a snack in between meals. With your safety also in mind, our reusable thermos food containers for hot food are BPA-free. Food jar is hand-wash only. **NOTE:** Please do not overfill the jar or store food in the lunch jar for more than 24 hours. Please do not over-tighten the lid and do not force it open.

# Stainless Steel Straws

ECO-FRIENDLY, HIGH QUALITY, REUSABLE:

Our metal straws are made of top 18/8 food grade stainless steel, FDA Approved, BPA Free, Lead Free, no metal aftertaste, no oxidation, colorfast, dishwasher safe, reusable and environmentally friendly. One set of stainless steel straws can be used for years to come - replacing hundreds or thousands of plastic straws.

# Stainless Steel Straws

Premium Reusable Metal Drinking Straws customized size

Customized package available

Customized color available

### coating

#### polishing

Polishing is aimed at obtaining a smooth surface or a specular gloss. When polishing, the high-speed rotating polishing wheel (circumferential speed of 20 m./ sec or more) is pressed on the workpiece to cause the abrasive rolling and micro-cutting on the surface of the workpiece, thereby obtaining the bright Machined surface

#### Spray paint

A method of applying a uniform and fine mist droplet to a surface of an object to be coated by means of air pressure by means of a spray gun ,Low cost and environmentally friendly paint

#### powder coating

The coating powder does not need thin materials, construction environmental protection, non-toxic to human body;Excellent coating appearance, strong adhesion, high mechanical strength, spraying curing time is short; Coating corrosion - resistant, wear - resistant, environmental protection, non - toxic

#### electroplate

The electroplating process is a method of laying a layer of metal on the conductor by the principle of electrolysis, which can enhance the corrosion resistance of the metal (the corrosion-resistant metal is mainly used for the electroplating metal), increase the hardness, prevent the abrasion, improve the conductivity, the smoothness and the resistance. Heat and beautiful appearance

etc. ...

### logo

#### Silk screen

Screen printing is not limited by the size and shape of the substrate. The ink layer has strong covering power and is suitable for various types of ink. It is convenient to plate, cheap price and low cost. Generally only 1-3 colors can be printed

#### Emboss

Emboss must have corresponding molds, the high cost, pattern and product are integrated, will not fall off, can improve product grade. The color of the logo is the same as the color of the cup

#### Laser logo

Laser engraving process is based on CNC technology, safe and reliable: non-contact processing, precise and meticulous; processing accuracy can reach 0.02mm, saving environmental protection: small beam and spot diameter, consistent with the batch effect, high speed, low cost: not limited by the number of processing

#### Sublimation

Sublimation is mainly to heat the pigment molecules into the medium. The color is vivid and the layers are distinct. The sublimation technology is a printing technology that truly achieves photo quality. It is waterproof, UV-resistant and anti-fingerprint than other printing technologies. Have a greater advantage in performance and higher cost

#### Water sticker

The water sticker is actually a brand-new transfer technology. It is applied to the surface of any curved and curved surface. The pattern and color are vivid and vivid, which greatly increases the added value of the product.

#### 3D printing

The pattern is printed on the product through a 3D printer, the color is bright, the pattern has a concave and convex shape, and the complicated graphic can be operated

#### Gas dye printing

Gas dye printing is a consumable for printing on a special layer of paper (flower bud) for gas dyeing with special gas-dyeing ink. Any complicated pattern can be transferred, there will be 360-degree seam, high cost, clear pattern

#### Water transfer printing

Water transfer is a kind of printing that uses water as a dissolving medium to transfer colored pattern transfer paper/film onto the product and transfer any natural lines, photographs and images onto the product. The limitation is that it The transfer image is easily deformed, which is related to the shape of the product, and also related to the nature of the water transfer film itself. The higher the price, the more complicated the process

etc. ...

#### heat transfer printing

The transfer process transfers the fine pattern on the transfer film to the surface of the product through one treatment (heating and pressurization) by the heat transfer machine. After forming, the ink layer is combined with the surface of the product, which is realistic and beautiful, greatly improves the grade of the product, low production cost, strong hiding power, strong adhesion, conforms to the green printing standard, and no pollution.
